

Diversified-IT provides Organizational Change Management (OCM) and Training Services for large scale ERP/EHR (SAP and Oracle) implementations. We manage the “people side” of large business transformation initiatives to elevate adoption and user efficacy.

When Diversified-IT engages in ERP business transformation initiatives we know cookie-cutter solutions just don't work. Organization cultures are like no other, and your approach should be too. We listen, observe, craft, and implement an OCM and training solution that is orchestrated, yet agile, designed exclusively for your footprint only.
